

# EXHIBIT 16: BRIDGE & BUILDING SIGNS

## BRIDGE SIGNS:

- Signs must be posted on the approach to the bridge in an area that is clearly visible by oncoming traffic at both ends
- Signs shall include maximum load limit (minimum load is 20 tons)
- Signs shall include vertical clearance limit (minimum clearance is 13 feet, 6 inches)
- Lettering shall be of a contrasting color to the sign background.
- Reflectorized signs are highly recommended!

## BUILDING SIGNS:

- All interior & exterior doors providing access to fire protection or building systems shall be labeled.
- Examples: electrical rooms, utility rooms, fire control panels, fire riser rooms, standpipes, test valves, roof access, etc...
- Signs shall be a minimum size of 12"x12".
- Characters shall be at least 1-inch-high in block lettering with a minimum of 1/4" stroke.
- Lettering shall be of a contrasting color to the sign background.
- Reflectorized signs are highly recommended!
